RAMCAR BATTERIES

Automotive & LCV Batteries

Precision-engineered with over 100 years of expertise, RAMCAR delivers high-performance batteries that keep you powering ahead.

Powering Everyday Mobility

RAMCAR Automotive & LCV batteries are engineered for everyday reliability, delivering consistent power for everyday mobility. Built for durability and dependable performance, they provide confidence on every drive. Designed for standard automotive and light commercial vehicle (LCV) applications, they deliver long-lasting performance users can trust day after day. Built with robust construction, RAMCAR batteries feature EnduroGrid™ Advanced Grid Technology and RamCarbon™ Advanced Paste—specially formulated to maximize power output, reduce charging time, and increase cycle endurance.

Powering the Industry Since 1919

RAMCAR has been powering the industry for over 100 years. A century of experience has positioned RAMCAR as a trusted partner. Our unwavering commitment to innovation and quality has defined us since our founding. To this day, RAMCAR continues to stay at the forefront of battery technology, consistently adapting to meet evolving customer needs. And as the industry evolves, so does our drive to stay ahead. It's this same commitment that continues to power our progress today. And that commitment is what drives us—year after year.

Automotive & LCV Batteries

- Dependable starting power
- RamCarbon™ Advanced Paste, specially formulated to maximize power output, reduce charging time, and increase cycle endurance
- EnduroGrid™ Advanced Grid Technology provides superior mechanical strength, secure active material retention, improved corrosion resistance and consistent current flow for long-lasting performance
- High-purity electrolyte engineered to minimize water loss and reduce self-discharge for extended performance and longer life
- Built-in, ergonomically designed handles ensure ease of handling, providing safe and convenient lifting during transportation and installation
- Fortified terminal posts, connectors, and through-the-partition (TTP) cell design maximize current flow and capacity while delivering exceptional durability and extended service life
- Rigid Polypropylene case engineered to meet the toughest applications —high impact and vibration resistant
- Maintenance free design
