RAMCAR BATTERIES

Marine & Leisure Batteries

Precision-engineered with over 100 years of expertise, RAMCAR delivers high-performance batteries that keep you powering ahead.

Powering Ahead—On the Water & Beyond

RAMCAR's Marine & Leisure batteries are engineered to meet the demands of today's marine and recreational applications. Designed to deliver reliable starting power and sustained energy for onboard electronics and accessories, they support consistent performance throughout seasonal use. Built to withstand harsh marine environments, RAMCAR Marine & Leisure batteries provide the durability, reliability, and dependable power that enthusiasts and professionals rely on—on the water and beyond.

Powering the Industry Since 1919

RAMCAR has been powering the industry for over 100 years. A century of experience has positioned RAMCAR as a trusted partner. Our unwavering commitment to innovation and quality has defined us since our founding. To this day, RAMCAR continues to stay at the forefront of battery technology, consistently adapting to meet evolving customer needs. And as the industry evolves, so does our drive to stay ahead. It's this same commitment that continues to power our progress today. And that commitment is what drives us—year after year.

Marine & Leisure Batteries

RAMCAR offers a comprehensive range of flooded Marine & Leisure batteries, including starting, dual purpose, deep cycle and heavy duty deep cycle. Engineered for long-term durability and consistent power delivery, these batteries perform reliably in demanding marine and recreational vehicle applications, keeping you powering ahead. Built with robust construction, RAMCAR batteries feature EnduroGrid™ and EnduroGrid™ HDX Advanced Grid Technology, combined with RamCarbon™ Advanced Paste—specially formulated to maximize power output, reduce chargingtime, and increase cycle endurance.

Features & Benefits

- High Marine Cranking Amps (MCA)—up to 1750 MCA
- High Reserve Capacity—up to 430 RC
- RamCarbon™ Advanced Paste, specially formulated to maximize power output, reduce charging time, and increase cycle endurance
- EnduroGrid™ and EnduroGrid™ HDX Advanced Grid Technology provides superior mechanical strength, secure active material retention, improved corrosionresistance and consistent current flow for long-lasting performance
- High-purity electrolyte engineered to minimize water loss and reduce self-discharge for extended performance and longer life
- Built-in, ergonomically designed handles ensure ease of handling, providing safe and convenient lifting during transportation and installation
- Fortified terminal posts, connectors, and through-the-partition (TTP) cell design maximize current flow and capacity while delivering exceptional durability and extended service life
- Rigid Polypropylene case engineered to meet the toughest applications —high impact and vibration resistant
- Maintenance-free design
